

# City of Baltimore Building & Surface Elevation

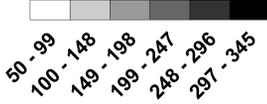

## MAP KEY

- Vegetated Area
- Neighborhood Boundary
- Spot Elevation
- Major Water Body
- Index Contour
- Major City Park
- Interstate Highway
- Major Streets
- Tunnel
- Residential Streets

### Surface Elevation (FT)

### Building Heights (FT)

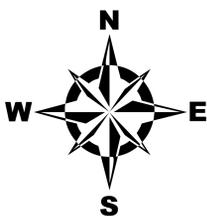

DEM was created from SPOTDTM points using ArcGIS (resolution = 20ft).

Contours were captured to American Society of Photogrammetry and Remote Sensing Class I Accuracy Standards for 1" = 40' scale maps for most areas within Baltimore City. For City reservoirs, Class I Accuracy Standards were met for 1" = 100' scale maps.

Building heights were calculated by EGIS staff using SPOTDTM points provided with the base 2ft contours.

Source Contour Interval = 2ft  
Displayed Contour Interval = 40ft

Stephanie Rawlings-Blake  
Mayor
